**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I claims 1-32 in Paper No. 11 is acknowledged. The traversal is on the ground(s) that the claims have been amended to avoid restriction. This is not found persuasive because method and apparatus groups still require separate searches and combination subcombinations remain distinct in their claim features. For instance, invention I of claims 1-32 do not require an infeed section whereas claims 33-57 require such a section. Claims 51-57 further require a spacing mechanism not required in claims 1-32. Claims 64-73 drawn to a method define a first and second lane not defined in claims 1-32. Claims 49-50 require means for feeding invoking 112 6<sup>th</sup> paragraph limitations not required in claims 1-32.

The requirement is still deemed proper and is therefore made FINAL.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. This application contains claims directed to the following patentably distinct species of the elected Group I, claims 1-32, invention:

Species I as in Figure 2A

Species II as in Figure 2B

Species III as in Figure 2C

Species IV as in Figure 2D

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1 and 18 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 3721

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.
